About Us

Krutanic is a fast-growing **EdTech** platform dedicated to empowering students & professionals with industry-relevant skills for the modern job market. Founded in 2024 and headquartered in **Bengaluru**, **Krutanic** focuses on bridging the gap between academic learning and real-world industry requirements.

At Krutanic, we believe learning should be flexible, engaging, and impactful. Our programs include interactive sessions, real-world projects, mentorship, and performance-based assessments to help students build strong portfolios and confidence.

Empowering Your Career with Trusted Partnership

Krutanic is aligned with the National Skill Development Corporation (**NSDC**), ensuring our programs meet industry standards and deliver high-quality, job-ready training. This partnership enhances credibility, practical learning, and career opportunities for our learners.

What Is Krutanic All About

Krutanic is an emerging EdTech platform focused on delivering career-oriented training designed to meet current industry demands. It aims to equip learners with **practical knowledge** and **skills** that are directly applicable in real-world job roles.

The platform emphasizes **hands-on learning** through structured programs that combine technical knowledge with **practical implementation**, enabling learners to gain exposure to industry tools, workflows, and problem-solving approaches essential for today's competitive environment.

Krutanic stands out by focusing on **skill development**, **real-time application**, and **continuous learning support**, with the goal of helping individuals enhance their capabilities, adapt to evolving industry trends, and build a strong foundation for long-term career growth.

Our Track Record 2024 – 2025

₹16L – Highest CTC Record (2025 Cohort)

87% – Placement Rate Within 60 Days

4.8 – Learner Satisfaction (350+ Reviews)

500+ Learners Enrolled Since 2024

₹8.2L – Average CTC Offered (2025 Batch Avg)

6 – Batches Completed (2024 – 2025)

30 – Max Cohort Size (By Design)

20+ – Active Hiring Partners (Live Network)

SCOPE OF DATA SCIENCE IN MARKET

10M+ Data Science Jobs Worldwide

Rapid growth in demand for data professionals

Fastest Growing Industry

Data Science is among the top emerging tech fields

85%+ Data Growth Every Year

Massive increase in structured & unstructured data

90% Businesses Data-Driven

Companies rely on data for decision-making

High Demand for Skilled Data Scientists

Organizations need data-driven insights

One of the Top In-Demand Careers

Strong job security & global opportunities

Shift Towards Data-Driven Decisions

Businesses depend on analytics, not guesswork

Data is the New Oil

Valuable asset powering modern companies

JOB ROLES POST COMPLETION OF THE PROGRAM

FEATURES OF THE PROGRAM

DATA SCIENCE & AI MASTERS

Industry-Driven Curriculum

Built around real-world Machine Learning, AI, analytics, and deployment workflows used across modern industries.

Real-World AI Projects

Work on industry-focused projects including recommendation systems, forecasting, NLP, and predictive analytics.

Mentor-Led Learning

Guided by experienced Data Scientists, AI Engineers, and analytics professionals with practical implementation focus.

Portfolio Development

Build production-ready dashboards, ML models, and capstone projects for strong interview-ready portfolios.

End-to-End Data Science Expertise

Master Data Cleaning → Analysis → Visualization → Machine Learning → Deployment workflows.

AI & Machine Learning Integration

Learn Python, SQL, Pandas, Scikit-Learn, TensorFlow, Deep Learning, NLP, and MLOps fundamentals.

Hands-On Practical Approach

Learn through coding assignments, real datasets, business case studies, and implementation-focused sessions.

Career Acceleration Support

Resume building, LinkedIn optimization, mock interviews, portfolio reviews, and hiring preparation support.

Small Cohorts (High Attention)

Personalized mentorship, doubt-solving, project reviews, and continuous performance tracking.

Outcome-Focused Training

Designed for high-growth roles like Data Scientist, ML Engineer, Data Analyst, AI Engineer, and BI Analyst.

TOOLS & AI STACK

40+ INDUSTRY TOOLS YOU'LL MASTER

STATISTICS & ANALYSIS

DATA INTEGRATION & ETL

CLOUD PLATFORMS

★ EXTRA TOOLS INCLUDED

MONTH 1

DATA FOUNDATIONS, EXCEL & SQL

OBJECTIVE

Build strong analytical, business, and database fundamentals.

TOPICS COVERED

- 1 Introduction to Data Analytics & Data Science
- 2 Business Metrics & KPI Understanding
- 3 Data Cleaning & Transformation
- 4 SQL Fundamentals
- 5 Advanced Excel for Analytics
- 6 Pivot Tables & Dashboards
- 7 Joins, Aggregations & Filtering
- 8 Lookup Functions (VLOOKUP, INDEX-MATCH)
- 9 Subqueries & SQL Statements

TOOLS

Excel

MySQL

SQL Server

PROJECT

SALES & CUSTOMER PERFORMANCE DASHBOARD

Build an interactive dashboard to analyze sales trends, customer behavior, and business performance using Excel, SQL, and data analytics techniques.

SALES DASHBOARD

Total Sales

\$1.34M

▲ 12.5%

Total Orders

23,456

MONTH 2

PYTHON & MACHINE LEARNING FOUNDATIONS

OBJECTIVE

Learn programming, data handling, and core ML concepts.

TOPICS COVERED

- 1 Python Fundamentals
- 2 Variables, Functions & Loops
- 3 NumPy & Pandas
- 4 DataFrames & Data Manipulation
- 5 Data Visualization Basics
- 6 Supervised Learning
- 7 Unsupervised Learning
- 8 Model Evaluation Techniques
- 9 Ensemble Methods (Random Forest, XGBoost)

TOOLS

Python

Jupyter Notebook

NumPy

Pandas

Scikit-Learn

MACHINE LEARNING WORKFLOW

Data

PreprocessingModel
TrainingModel
Evaluation

Prediction

ALGORITHMS COVERED

SUPERVISED LEARNING

- Linear Regression
- Logistic Regression
- Decision Trees
- Support Vector Machine
- K-Nearest Neighbors

UNSUPERVISED LEARNING

- K-Means Clustering
- Hierarchical Clustering
- DBSCAN
- PCA

MODEL EVALUATION TECHNIQUES

Accuracy

Precision

Recall

F1-Score

Cross Validation

PROJECT

CUSTOMER CHURN PREDICTION SYSTEM

Build a machine learning model to predict customer churn based on behavior, demographics, and usage patterns. Analyze key factors and create insights to help reduce churn and improve customer retention.

MONTH 3

DEEP LEARNING & BIG DATA

OBJECTIVE

Build AI models and work with large-scale datasets.

TOPICS COVERED

- 1 Neural Network Fundamentals
- 2 CNN & RNN Architectures
- 3 TensorFlow & Keras
- 4 Model Optimization
- 5 Hadoop Ecosystem
- 6 Apache Spark
- 7 Big Data Pipelines
- 8 MongoDB & NoSQL
- 9 Kafka for Real-Time Processing

TOOLS

Other		0.6%

IMAGE CLASSIFICATION AI MODEL

Build a deep learning model to classify images into different categories using CNN architecture and deploy a real-time prediction system.

MONTH 4

NLP, AI APPLICATIONS & VISUALIZATION

OBJECTIVE

Master NLP, dashboards, and business storytelling.

TOPICS COVERED

- 1 NLP Fundamentals
- 2 Text Preprocessing
- 3 Sentiment Analysis
- 4 Named Entity Recognition
- 5 Transformer Models (BERT, GPT)
- 6 Tableau & Power BI
- 7 Matplotlib & Seaborn
- 8 Interactive Dashboards
- 9 Data Storytelling

PROJECT

SOCIAL MEDIA SENTIMENT ANALYSIS DASHBOARD

Build an interactive dashboard to analyze social media sentiments and extract meaningful insights.

MONTH 5

CLOUD, FEATURE ENGINEERING & RESPONSIBLE AI

OBJECTIVE

Learn scalable AI systems and model optimization.

TOPICS COVERED

- 1 Feature Engineering
- 2 PCA & Dimensionality Reduction
- 3 Hyperparameter Tuning
- 4 Cloud Computing Basics
- 5 AWS for Data Science
- 6 Azure & Google Cloud
- 7 Ethical AI
- 8 Bias Detection
- 9 Responsible AI Systems

PROJECT

CLOUD-BASED PREDICTIVE ANALYTICS PIPELINES

Build an end-to-end cloud-based pipeline to collect, process, model, and visualize data for predictive analytics.

MONTH 6

CAPSTONE & PLACEMENT PREPARATION

OBJECTIVE

Become industry-ready with projects and interview preparation.

TOPICS COVERED

- 1 End-to-End Capstone Project
- 2 Fraud Detection Systems
- 3 Model Deployment
- 4 Resume Building
- 5 LinkedIn Optimization
- 6 Mock Interviews
- 7 Portfolio Development
- 8 Case Study Discussions
- 9 Placement Preparation
